Class Name: Pendragon Term : Spring 2021 Theme: Space

What we have been learning:

What a term! However, I have really enjoyed getting to know all the pupils and we have had fun with our space topic.

In English we have been working on our verbs (doing words). We started the term with a story called 'Back to Earth with a Bump' followed by an animated story called 'The Way Back Home'. We then moved on to listening to a story about an astronaut that was read to us by an astronaut on the ISS. This was very popular and so was learning about how the astronauts live on the ISS. All this linked into verbs. These last couple of weeks we have been writing poems using all the verbs that we have learnt. We are still practising our reading and phonics everyday too.

In Maths we have been focusing on our adding, number skills and halves and quarters. We have really enjoyed playing Maths games once a week with our class friends.

The afternoons see us cooking, getting creative, exploring through science, making a mess and we must not forget the rocket launch with Jon earlier in the term.

I think by far our favourite afternoon activity has been our spaceology. We have built it up as the weeks have gone by so that we visit each planet through our senses, movement and music. It now takes an entire afternoon to get round the whole solar system and back to Earth!

Have a lovely Easter break and we will see you again in two weeks.

Take care,

The Pendragon Team.

Some photos of our learning

I had so many photos to share but could only select a couple!

Dates to remember

Last day of term is Thursday 1st April 2021
School starts back on Monday 19th April 2021
