

Classroom News

Class Name: Chillingham

Term: Spring 1 2022

Topic: Transport

What we have been learning this term:

This term our topic has been Transport. In English the children have been doing a range of reading activities from matching object to symbol, symbol to symbol, word to word, word to picture, to reading sentences.

In maths we have been focusing on shape. The children have been sorting shapes, matching shapes, finding shapes in pictures and completing a variety of puzzles using numicon.

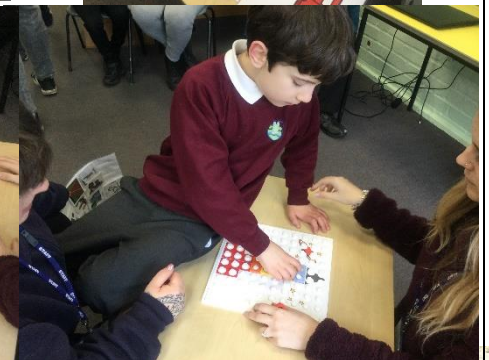

In cooking this term the children have been exploring food that they can eat with a spoon. The children have been encouraged to scoop the food onto the spoon to eat it. The children have been great at exploring the different foods even when unsure. Lots of the children have licked or bitten foods that they wouldn't normally do.

Turn taking games on the computer has been great this term. The children love the songs on the computer and have been sharing with each other really well. The children have had to wait for their name to be called to have their turn and accept waiting for other children to have theirs. We have seen an increased tolerance and patience when waiting for their turn amongst the children.

To link with our Transport topic, we have been doing road safety in Life Lessons. The children have experienced stop and go in a range of activities, responding to stop and go at a zebra crossing and pressing the button of the pelican crossing and waiting for the lights to change.

Well done everyone.

Some photos of us!

Dates & Points to remember:

10th February – Last day of term
20th February – First day of term
