

Classroom News

Class Name: Tiverton

Term: Term 4 2022-2023

Topic: Machines

What we have been learning this term:

Tiverton Class have been looking at reading for comprehension Finding out about George Stephenson, Henry Ford and the Wright brothers. We have linked this with our writing and been producing fact files about these famous inventors.

In maths we have continued looking at number and focused on measures this term including telling the time, measuring length, weight and capacity. The class have had opportunities to apply the skills learnt by measuring various objects in and out of the classroom.

We were extremely lucky to have our printing art work show cased at City Arts Hub in Newbury town centre over a weekend. The students thoroughly enjoyed seeing their work on display.

During DT and problem solving sessions the class have been planning and making balloon buggies. This took a lot of perseverance, problem solving and evaluating. Jake was extremely proud when he got his balloon buggy to travel the length of the class.

The class has also been lucky in having the chance to have a workshop with Maddy from the train station who told them all about trains and how to be safe whilst travelling. The class was very excited in having the opportunity to travel by train to Reading station. When at reading station they had the opportunity look around the station. Some of the class were brave enough to travel the large escalators!

The class thoroughly enjoyed the try a bike session! Lots of big smiles, whilst trying out some unusual bikes.

Some photos of us!

Dates & Points to remember:

Last day of term: 31st March

First day back: 17th April
