Term: 5

Plympton Class

What we have been learning this term

It has been a short term but with plenty of opportunity with the better weather!

This term we have been sowing some seasonal vegetables and the last of our late may flower seeds at Growing 2gether. We hope to boost the pollen and nectar for our bees and butterflies as well as grow some nutritious fruit and veg.

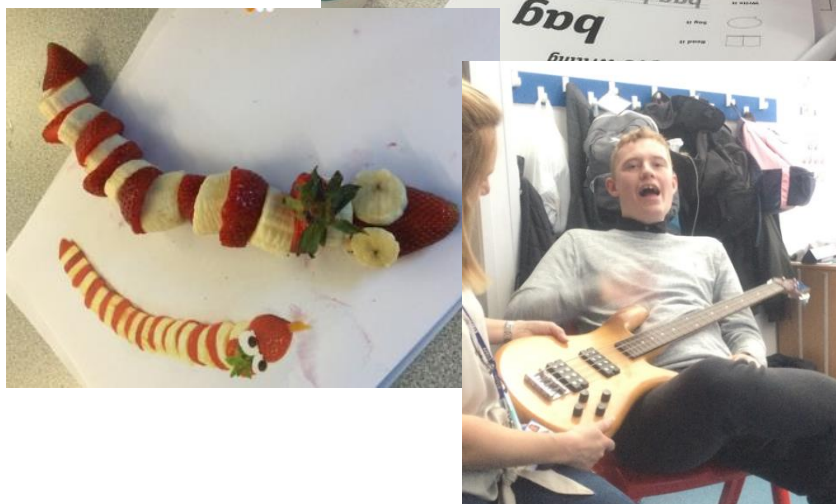

In class we have continued with our weekly shopping sessions in the community, working on prices and using self-scan checkouts.

Our Wednesday music sessions have explored the sensory feeling of music with resonance boards. Later this term we started our own personal performances with different instruments and backing tracks, using the sensory room to imitate visual lighting effects. Awesome performances and fun from the team.

We hope you have a lovely half-term.

Photos of our learning

Plympton's WOW moments

Louise has been showing us some fantastic skills in her hair care session. Brushing, braiding with support and using clips on the practise dolls to make tidy and clean hair!

Cameron has done amazing work in his story work which follows with a task of washing and drying socks. Cameron has mastered the washing peg and enjoyed the process of washing and drying.

Oliver has been wonderful at his work experience placement at Baydon Stores with such wonderful feedback from the people who support Oliver there. Stocking, cleaning and greeting customers.

Philip has had a blast in the *Out In nature* group on a Thursday afternoon. Keenly walking as part of a group and enjoying the exercise that he loves!
