

Classroom News

Class Name: Whittington

Term: Summer 1 2025

Topic: Diversity

What we have been doing this term:

Whittington have had another productive and creative start to the summer term!

In English, we have been immersed in our topic 'Viewpoints and Issues.' We have explored planning and creating a counter-argument in response to a current issue. This resulted in some interesting discussions and enabled students to understand opposing opinions. Students were able to effectively express their understanding and listen to other opinions.

In Maths Whittington have practised using column vector notation in translation. Students have created some interesting shapes and used vector translations effectively.

In Science we have learnt about Breathing, Respiration and Gas Exchange – predicting which candle flame will go out first when air is blown at different levels. The results were quite surprising! Everyone enjoyed cooking this term.

Cooking has been a huge success with a firm favourite dish being the cottage pie! All students enjoyed making this and were very happy with the tasty results!

DT has enabled all students to be creative in their own ways, getting involved in creating projects for the garden and making their own key fobs! Students have fully engaged in their offsite activities this term. These included visiting a care farm, sailing, parkour and visiting Theale train station!

We hope you have a lovely half term and the weather remains warm and sunny!

Some photos of us!

Dates & Points to remember:

Last day of term: Friday 23rd May
Back to school: Monday 2nd June
