

# What happened to this strange circular shape in the garden @Theale?

A few of our students went to Neptune Wood with a staff member from Earth Trust to explore living willow structures and to cut willow branches for our own garden @Theale.

...and then we got started!

...and in a big team effort over a few weeks we created this stunning living willow igloo. It will give us shade in the summer and be our outdoor sensory den. You can already see some fresh green leaves on the branches!
